Colour Match

For custom colour request, we can deal as following

1. Supply a physical sample of custom colour. A colour sample on metal is preferred, but if other, it is also acceptable, but the colour matching rate maybe not good as colour on metal.
2. New colour sample is usually offered by our paint supplier in 5-7 days, special colour should be in 7-10 days.
3. Upon receipt of colour sample, please approve in writing as soon as possible. Once you approve, we will arrange purchasing and production.

Colour difference maybe occurred in different production batch, so it is suggested all panels are placed in one order for same project. And keep same direction as arrow on protective film when installing to avoid and colour difference by vision
